Summary

I am a Full Stack Software Engineer with experience contributing to large, complex enterprise software stacks and engineering cutting-edge web applications serving high-volume customer-facing websites. I am balanced regarding platforms and non-ideological when choosing solutions to get a job done. I am an excellent communicator with non-technical and technical audiences and a proactive troubleshooter with a strong sense of ownership and collaboration, consistently delivering high-quality results in dynamic environments.

Skills - Technical

React.js, Javascript, TypeScript, HTML5, CSS, Node.js, ASP.NET, C#, Scala, Postgres, SQL, Go, Ruby on Rails, Linux, Heroku, Netlify, AWS, Docker, GitHub, GitLab

Experience - Selected

Feb 2022 - Present | **Senior Software Engineer, Rocket Travel, Inc, a Booking Holdings Company** | rockettravel.com

- Played a key role as part of a software engineering team, developing scalable, customer-facing, accessibility-minded frontend solutions for a B2B2C travel platform used by high-volume corporate partners to offer travel products through their established brands.
- Worked to enhance a large, complex enterprise software stack to meet business objectives as well as engineer new solutions to accelerate customization for white-label travel products.
- Collaborated with globally distributed technical and non-technical stakeholders including design, product, and engineering teams across varying time zones to ensure alignment, successful project delivery and meet business goals.

Oct 2020 - Feb 2022 | **Fullstack Developer, Clear Demand, LLC** | cleardemand.com

- Working to improve, expand and develop new features for the Clear Demand client facing app with a focus on transitioning the core frontend codebase from AngularJS 1.3 to React/Typescript using modern javascript syntax and the latest ECMAScript language features.
- Responsible for development of supporting API endpoints in C# for consumption by the Clear Demand client facing app.

May 2018 - Oct 2020 | **Digital Fabricator, Urban Plough Furniture**

- Managed implementation of fabrication methodologies from detailed specification drawings to part programming for CNC machining through to assembly and installation

Jan 2013 - Feb 2020 | **Frontend Developer, SOOH Media**

- Managed and developed frontend for freestanding, touchscreen-operated, networked photo booth kiosk used by brands for digital advertising and social engagement
- Developed client reporting and engagement data parsing from PostgreSQL data using Go programming language

2009 - 2013 | **Freelance Web Development, Ah Diós**

- Developed custom websites for clients to create a strong identity and web presence
- Developed custom CMS solutions for clients to control updates to their websites

2007 - 2009 | **Commercial Photography & Brand Development, BenasiRose**

- Created photography for brand advertising and identity campaigns through agencies and directly with commercial clients

Education

Mar 2020 - Sep 2020 | **Thinkful. JavaScript, Node Full Stack Engineering Program**
1999 - 2003 | **Arizona State University, Art(Photography)**
